AN INNOVATIVE FAMILY FIRM

Ammann is a world-leading supplier of mixing plants, machines and services to the construction industry, with core expertise in road-building and transportation infrastructure. Our strengths are the forthcoming approach of a family firm that has been operating for many years, coupled with our strong and well-established international presence. Since 1869, we have been setting benchmarks in the road-building industry, thanks to countless innovations and solutions that are as competitive as they are dependable.

True to our motto, "Productivity Partnership for a Lifetime," we gear our activities to the needs and requirements of our customers around the globe. We are aware that plants and machines that prove their merits day after day under tough operating conditions are the only way to give our customers the critical, competitive edge they need. As you would expect, we provide a well-developed service network and reliable supply of spare parts, together with support throughout the lifetimes of the plants and machines that we offer.

WHAT SETS AMMANN PLANTS APART?

FIT INTO TIGHT SPACES

Ammann plants have footprints of varied sizes, with some exceptionally small. Plants can still be productive, even in the smallest of spaces.

FORWARD THINKERS

What's the next big thing? No one can say for certain. That's why plants are engineered for easy integration of future options and technologies.

RECYCLING CONSUMER GOODS

In 2014, our ABP HRT (High Recycling Technology) plant produced mix with 99 percent recycled materials. Tires and printer cartridge toner were transformed from waste to liquid AC.

GOOD NEIGHBORS

Plants come in all sizes and shapes, including a model that looks like a building. The appearance helps the plant blend into urban areas, as do reduced noise and dust levels.

100 PERCENT RAP

ABP HRT plants can utilize 100 percent RAP. Other key plants feature parallel-flow dryers that can use up to 60 percent hot recycled material.

OPTIONS FOR EVERY NEED

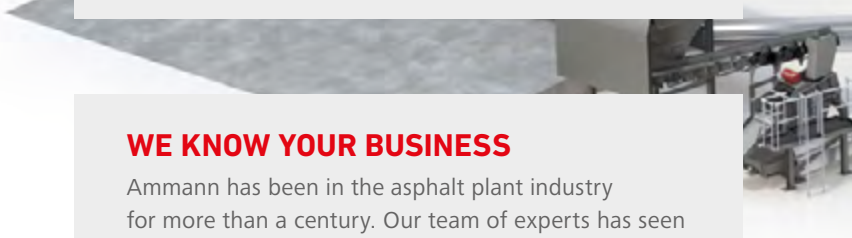
Ammann plants range from affordable with no frills to premium with many options. The sizes are big, small and in between. Plants are mobile, stationary and sometimes even a little bit of both.

NO WASTE

A patented green effort is the "zero waste system" used in Ammann continuous plants, which prevents the scrapping of 5.5 tons (5 metric tons) per shift.

REDUCED TRANSPORT AND INSTALLATION COSTS

When the plant arrives, plug-in components reduce costs and speed set-up. Some plants can be installed without the use of cranes or concrete foundations, another substantial cost- and time-saver.



LOCAL IF YOU LIKE

Ammann manufactures all core components but provides you the freedom to use your own local suppliers of non-critical parts and components such as silos.

WE KNOW YOUR BUSINESS

Ammann has been in the asphalt plant industry for more than a century. Our team of experts has seen virtually every asphalt plant challenge and can help you find the most effective solution.

"Ammann means asphalt-mixing plants with market-oriented solutions and customized service."

ASPHALT-MIXING PLANTS

CONSISTENT FROM START TO FINISH

Ammann offers batch and continuous plants to ensure customers have the method that works best for them. Both options provide the consistency that is crucial to your mix quality. All plant processes and components are carefully developed to ensure that feeding, heating, drying, screening and mixing seamlessly blend together. Helping integrate all the moving parts is the as1 Control System, which provides leading technology with a user-friendly interface.

AMMANN

ABP 240–400 HRT

PREMIUM BATCH ASPHALT-MIXING PLANTS

FOR PRODUCTION VOLUMES WITH LARGE PROPORTIONS OF RAP

The ABP 240–400 HRT (High Recycling Technology) plant maximizes the use of recycled asphalt and is even capable of using discarded consumables such as printer cartridge toner and tires.

The compact plant is ideal for production volumes with large proportions of recycled asphalt.

An integrated parallel drum system is positioned directly above the mixer and optimizes material flow while minimizing wear inside the recycling system.

HIGHLIGHTS

- Output of 265–440 tons/h (240–400 metric tons/h)
- Flexible and economical solution with ability to use a high percentage of RAP
- Fully integrated RAP drum to optimise material flow and wear protection
- Ability to introduce additives such as foamed bitumen, pigments and even consumer recyclables
- Wide range of equipment and components enables customization
- Infrastructure including cold feeders, drying drum and filter are enclosed and resemble a commercial building
- Reduced sound and dust levels

FILLER SUPPLY	According to customer's wishes: filler towers Ø = 10'6" or Ø = 12'5" in different desired configurations. According to customer's wishes: filler towers Ø = 3200 or Ø = 3800 in different desired configurations.				

*Hot mix production capacity based on following conditions: 10 % bitumen and filler addition, input moisture of aggregates 5 %, aggregate temperature increase 347 °F (175 K) and 0/2 fraction share max. 40 % | Mixing cycles 80 per hour.

ABA 100–340 UNIBATCH

ADVANCED BATCH ASPHALT-MIXING PLANTS

OPTIMIZED WITH CUTTING-EDGE TECHNOLOGY

Versatility makes ABA 100–340 UniBatch one of the most popular Ammann plants. The plant is among the lower-cost alternatives and is easy to operate and maintain. It also is known for its reliability.

ABA 100–340 UniBatch offers more flexibility than some other plants. It is easily customizable and often involves on-site Ammann engineering to ensure the potential of the plant is fully realized. Its layout is flexible and the plant is adaptable as a start-up or is easily integrated into existing sites.

HIGHLIGHTS

- Wide output range from 111–376 tons/h (100–340 metric tons/h)
- Maximum customization options combined with top performance and economic efficiency
- Designed for worldwide use, with mixing tower modules providing ease of transport
- Robust, tried-and-tested technology
- Optional feed for additives such as dye pigment, fibers and Ammann Foam
- Can be fitted and extended with numerous options
- Engineered for easy integration of future options and technologies

AMMANN

ABT 140–180 QUICKBATCH

TRANSPORT OPTIMIZED BATCH ASPHALT-MIXING PLANTS

INTERNATIONAL TRANSPORTATION EFFICIENCIES

The ABT 140–180 QuickBatch plant is engineered for easy, cost-effective transportation and installation while still offering benefits typically associated with stationary facilities.

ABT 140–180 QuickBatch's international transporting efficiencies are built around the "container principle" logistics concept. Containers cost less to transport, and the methods for shipping them are more easily available – factors that can generate substantial cost savings, especially if a plant is repeatedly relocated.

Key core components, including dryer/filter units and mixing tower modules, utilize housings that also serve as certified transport containers. The components are built as 20' or 40' units, the most common container sizes. When it's time to move, the components are simply loaded onto the transport vehicle. The entire plant is contained in 10 units.

Precision separates ABT 140–180 QuickBatch from most container plants. ABT 140–180 QuickBatch strictly adheres to international standards, helping plant owners avoid complications and ensuring all sea, land and train size requirements are met.

HIGHLIGHTS

- Output 134–199 tons/h (140–180 metric tons/h)
- Low transport costs due to the "container principle"
- Containers precisely match international standards to avoid transport complications
- Minimal packing/unpacking when relocating
- Reduced site development costs because the plant does not require a concrete foundation
- Lower installation costs because highly functional individual modules are linked via intelligent interfaces
- Provides every full-scale stationary mixing plant advantage in terms of output, performance and space requirements

FILLER SUPPLY	Reclaimed and imported filler silos	
HOT MIX STORAGE SILO / COMPARTMENTS	Standard direct loading from mixer. Option 35.4 tons; 640 ft^3 Standard direct loading from mixer. Option 32 metric tons; 18 m^3	
RECYCLING ADDITION UP TO 30 %	RAC directy into the mixer	

*Hot mix production capacity based on following conditions: 10 % bitumen and filler addition, input moisture of aggregates 3 %, aggregate temperature increase 347 °F (175 K) and 0/2 fraction share max. 40 % | Capacity figures subject to ± 10 % variation.

ACP 300–500 CONTIHRT

PREMIUM ASPHALT-MIXING PLANT

A CONTINUOUS RECYCLER

The Ammann ACP ContiHRT meets the needs of customers who want a continuous asphalt-mixing plant with advanced recycling capabilities.

The plant features a parallel RAP dryer for the addition of warm recycled materials and a separate cold recycling feed. This enables the plant to develop mix consisting of up to 60 per cent RAP.

Separate drying and mixing processes ensure the highest quality and flexibility – even when working with complex recipes that utilise RAP and additives. The plants also minimise emissions because RAP, binder and additives are heated at lower dryer temperatures.

HIGHLIGHTS

- Parallel RAH60 warm recycling system for high RAP utilisation of 60 per cent
- Separate cold recycling system for RAP utilisation of 30 per cent
- Separate drying and mixing processes deliver the highest quality and flexibility – even with complex recipes
- Horizontal plant design ensures fast and easy assembly and disassembly
- Continuous production capacities up to 550 tons/h (500 metric tonnes) per hour deliver maximum performance for large projects
- Capable of adding shingles, liquid additives, fibre granulate and foam bitumen because of “zero waste” system

PLANT TYPE*	300	400	500
CONTINUAL PLANT CAPACITY AT 5 % MOISTURE	330 tons/h (300 metric tons/h)	440 tons/h (400 metric tons/h)	550 tons/h (500 metric tons/h)
RECYCLING SYSTEM	RAH60 (parallel flow)		
MAX. RECYCLING ADDITION	60 %		
NUMBER OF RECYCLING FEEDERS	As desired		
CONTENT RECYCLING FEEDERS	706 ft^3 (20 m^3)		
TYPE RECYCLING DRYING DRUM	RT 25140	RT 29140	RT 32140
MAX. RECYCLING CAPACITY AT 3 % MOISTURE	198 tons/h (180 metric tons/h)	264 tons/h (240 metric tons/h)	330 tons/h (300 metric tons/h)
BURNER RECYCLING DRUM POWER OUTPUT	40.9 million Btu/h (12 MW)	54.6 million Btu/h (16 MW)	68.2 million Btu/h (20 MW)
FUELS	Natural gas, fuel oil extra light, liquid propane gas (LPG)		
BAGHOUSE CAPACITY	6 075 SCFM5 (90 000 Nm^3/h)	71 028 SCFM (114 000 Nm^3/h)	87 227 SCFM (140 000 Nm^3/h)
NUMBER OF COLD FEEDERS	As desired		
CONTENT COLD FEEDERS	706 ft^3 (20 m^3)		
TYPE DRYING DRUM	T 27110	T 29120	T 32140
MAX. DRYING CAPACITY AT 5 % MOISTURE	400 tons/h (363 metric tons/h)	530 tons/h (481 metric tons/h)	585 tons/h (532 metric tons/h)
BURNER POWER OUTPUT	88.7 million Btu/h (26 MW)	109.19 million Btu/h (32 MW)	136.49 million Btu/h (40 MW)
FUELS	Natural gas, fuel oil extra light, liquid propane gas (LPG)		
AGGREGATE SCALE	Weighing belt		
FILLER SCALE	Weighing screws (optional)		
BITUMEN SCALE	Coriolis massflow system		
TYPE MIXER	Amix twin-shaft paddle mixer with mix dwell time control for filling level		
MAXIMUM MIXING CAPACITY	352 tons/h (320 metric tons/h)	440 tons/h (400 metric tons/h)	550 tons/h (500 metric tons/h)
HOT MIX STORAGE SILO / COMPARTMENTS	330 tons (300 metric tons) 2 compartments (with drag slat) Option to 660 tons (600 metric tons) 4 compartments other configuration are available under request		
COLD RECYCLING ADDITION AT 3 % MOISTURE	Up to 30 % RAC addition directly into the mixer		
COLD RECYCLING SCALE	Weighing belt		
BINDING AGENT SUPPLY	E-Bit, vertical configurations, 26,420 U.S. gal, 30,380 U.S. gal, 39,630 U.S. gal, also divided tanks available. E-Bit, vertical configurations, 100 m^3, 115 m^3, 150 m^3, also divided tanks available.		
FILLER SUPPLY	According to customer's wishes: filler silos in different desired configurations		

*Hot mix production capacity based on following conditions: 10 % bitumen and filler addition, input moisture of aggregates 5%, aggregate temperature increase 175 170 K (338° F) for virgin aggregate and 120 K (248° F) for recycling asphalt and 0/2 fraction share max. 40 %.

AMMANN CORE COMPONENTS

EVERYTHING FROM ONE SOURCE

Ammann premium asphalt-mixing plants utilize complex process engineering that requires perfect interaction between all individual components. So essential is this integration that Ammann develops and manufactures all core components, including drums, burners, filters, screens, controls and mixers in house. Doing so is the only way to guarantee that our plants will meet the demanding requirements and standards of the modern market environment. Ammann is currently the only manufacturer of asphalt-mixing plants to offer this single-source approach, establishing us as a professional partner to handle every aspect of your asphalt-mixing plant. We provide answers when you need them and keep an open mind in order to fully understand your needs.

BURNERS AND DRYERS

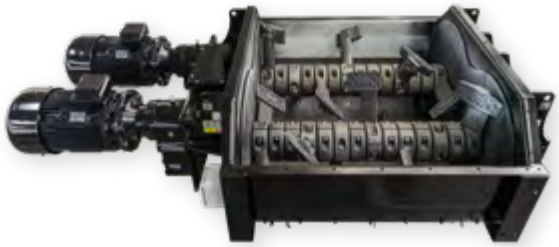
Ammann burners and dryers are highly reliable, productive and feature cutting-edge technology. Robust, compact and energy-efficient designs minimize maintenance requirements and reduce fuel consumption. The burners and dryers are adaptable to multiple Ammann plant types and built for easy operation. A wide range of options is available.

SCREENS

Ammann screens are highly reliable and properly sort materials. Optimal material load maximizes available screen area usage. A dust-free screen house is among the expertly engineered features. The screens are easy to operate and require minimal maintenance. A wide range of options is available.

FILTERS

Flow is optimized through a highly technical analysis. The filters perform well from top to bottom and minimize service time. Ammatex filter bags offer high temperature resistance and eliminate the need for a fresh air damper. PTFE coating and seams create exceptional resistance and longer life. Improved thermal insulation contributes to the plant's efficiency.



MIXERS

Mixers are highly reliable with short mixing times. Maintenance is minimal and all components work seamlessly and efficiently because of Ammann's quality engineering. The operator-friendly mixers are an integral part of Ammann plants.

AS1 CONTROL SYSTEM

POWERFUL, RELIABLE AND PROVEN WORLDWIDE

The powerful and future-oriented as1 system concept combines proven Ammann software with specially matched industrial hardware. The as1 computing environment has been designed and tested for use in tough environments. Its networking capability also has been optimized. Customers profit from the flexible workstation configuration, networking and administration.

THE FIELD BUS SYSTEM

GUARANTEED FOR RELIABLE SIGNAL TRANSFER

The proven field bus system is robust and reliable under tough operation. Faults can be detected efficiently and rectified by means of the diagnostic tools, even via remote support.

THE POWER CABINET'S COMPONENTS

DESIGNED FOR TOUGH, ROUND-THE-CLOCK OPERATION

The power cabinet's components have to withstand extreme stress 24 hours a day, which is why Ammann only uses tried-and-tested, globally available quality components from renowned manufacturers.

HIGHLIGHTS

- Comprehensive system functionality
- Quick and easy to learn
- Safe to operate
- Proven, reliable field bus and load-sharing
- Professional hotline and support organisations ready for service worldwide

HOTLINE AND SUPPORT

PLANT AVAILABILITY ASSURED

Electromechanical faults can be quickly resolved by the customer's own personnel with the help of the electrical circuit diagrams and the as1 diagnostic tools. Ammann's knowledgeable customer service team staffs the hotline, which can be called for fault diagnosis or maintenance at any time. Modern telecommunications media increase the availability of the plant and reduce the need for costly on-site servicing.

AFTER SALES

COVERING ALL NEEDS

Contracted maintenance services and technician training provided by Ammann help protect your investment, while operator training ensures your team is able to utilise all the features and benefits built into your plant. When your needs change, Ammann offers retrofit options that can provide you with a good-as-new plant at a low cost.

PUT AMMANN EXPERTISE TO WORK

Ammann offers service packages that ensure all maintenance is current, making your plant efficient and also protecting it from premature wear that can result from poor service practices. A variety of technical service packages are available. Or, if you prefer, an Ammann representative can visit your plant and together you can develop a plan that perfectly fits your needs.

VALUE AND AVAILABILITY

Ammann parts provide the best value over the life of your plant. The parts are built to last and have a longer life than low-cost products on the market. Ammann parts also are a perfect fit for your plant, enabling other components to run more efficiently and last longer. Availability is another key Ammann focus. The Ammann logistics team recently overhauled stocking centres and processes to ensure the most essential parts are always nearby.

READY WHEN YOU ARE

Ammann experts are ready to assist you in emergency situations 24 hours a day, seven days a week. The customer hotline team is highly trained and experienced. Representatives can talk you through the challenges – in many different languages – with a remote connection to your system that will minimise the troubleshooting time.

TRAINING

FULFILL YOUR PLANT'S POTENTIAL WITH TRAINING

Your plant features components engineered for productivity and technology that can deliver benefits unheard of just a few years ago. Yet those components and that technology are only as good as the operator using them. How can you help operators make the most of the tools at their disposal? The answer is training.

WORLDWIDE TRAINING CENTRES

Ammann has more than 10 regional training centre locations around the world.
Key teaching themes connect them all.

- A good balance. The centres combine a traditional class-room setting with hands-on experience, including the availability of plant components for maintenance lessons.
- Experiment without consequences. The as1 control system simulator provides operators with realistic scenarios with-out running the risk of wasting material or causing plant downtime. Operators can experiment and learn from their mistakes – without costly consequences to your operations.
- Learn from peers. Operators from other facilities attend the training. Participants say the conversations with their peers – and learning how they overcome challenges – is another key benefit.
- Learn in your language. Lessons are taught in many languages, ensuring your team understands key terms and lessons and makes the most of your investment.

In addition, Ammann experts can customise a curriculum for your needs and work with operators and managers at your facility. The advantages include hands-on experience with your equipment and the ability to involve more of your staff than would likely be sent to a regional training centre. Choose from the Ammann training modules.
