

STRONGER TOGETHER

AMMANN

**“AMMANN PRODUCTS
ARE BUILT TO
PROVIDE CUSTOMERS
WITH SOLUTIONS.
WHEN WE HELP OUR
CUSTOMERS, WE
HELP EVERYONE.”**

FINDING SOLUTIONS TOGETHER

WHO WE ARE

Ammann is an innovative, customer-engaging business that has been family owned for six generations

WHAT WE DO

Develop and manufacture technologically advanced, sustainable products associated with the roadbuilding industry

WHERE WE DO IT

Locations in your country – and throughout the world

A PROVEN PATH

INNOVATIONS, PARTNERSHIPS AND SUSTAINABILITY

Since its establishment in 1869, Ammann has built a strong reputation as an innovator. That standing was further strengthened in 1908, with the patent of the first continually operational macadam machine.

The prototype was created with input from a road supervisor who wanted to provide structural strength to crumbling gravel roads. He took his request to Ammann experts, and a partnership was born.

Other customers followed, including many who were eager to eliminate dust – an emerging health hazard as the automobile became more prevalent. It was our first sustainable effort, with more many to follow. It became clear that when we help our customers, we help everyone.

Of course much has changed since 1908. But what's most amazing is how much has not. To this day Ammann:

- Partners with customers and strives to understand their needs.
- Cultivates technology to deliver solutions to those customers.
- Provides sustainable products that deliver productivity – while protecting the world around us.
- Develops internal teams who can transform an innovative idea into a problem-solving product.

It's a path that has worked for more than a century – and one Ammann most assuredly will continue to follow.

Hans-Christian Schneider
CEO Ammann Group

MAKING A DIFFERENCE

TECHNOLOGY THAT MATTERS

New technology can be interesting – even amazing. But does it make a difference on the jobsite? Is it intuitive so that operators can easily use it? These questions drive the innovation process at Ammann.

Z-BUFFER™

FOR APF PLATES

Protects operators by dramatically reducing unwanted hand-arm vibration

RECYCLING TECHNOLOGY FOR PLANTS

Maximises RAP usage, thereby reducing costs and preserving valuable natural resources

PAVEMANAGER FOR PAVERS

Automates key functions and provides real-time operator feedback

AMMANN COMPACTION EXPERT FOR ROLLERS

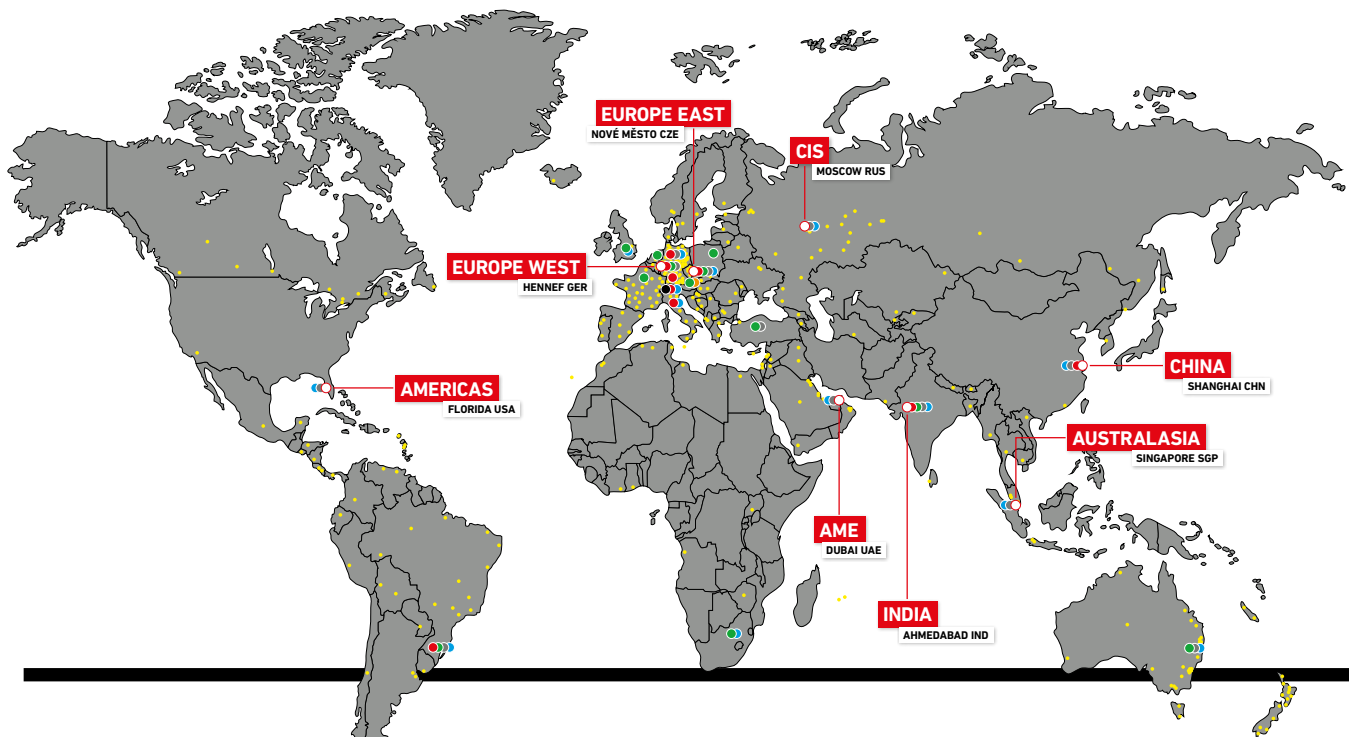

Eliminates guesswork and reduces the number of passes, lessening fuel costs and emissions

ADVANCED TELEMATICS FOR ROADBUILDING

Utilises cloud-based integration of machinery and processes to minimise machine wear and fuel burn

CONCRETE PLANT MIXING TECHNOLOGY

Efficiently delivers homogenous mixes, enhancing quality and minimising waste

KEEPING THE CUSTOMER CLOSE

LOCAL INPUT DRIVES GLOBAL IMPROVEMENTS

Ammann is headquartered in Langenthal, Switzerland, but the product development process often starts far from the main office.

Connecting Ammann with customers are dealer / agents at hundreds of locations around the world. The importance of these local ties in a global environment cannot be overstated.

Dealer personnel understand the customers' culture and speak their language. Many conversations centre on the challenges customers face – and include possible solutions, too. Countless product improvement efforts over the years have started with a dialogue between a dealer and a customer.

Helping strengthen those relationships is a robust network of regional offices. They provide support in the form of sales and marketing, parts, training, product distribution and warranties. The regional offices also have input on key strategies and even pricing, ensuring decisions take into consideration the needs of those they impact the most.

Ammann product development teams are located at our many manufacturing and regional offices around the world. These teams work to transform the raw customer input into tangible problem-solving features on plants and machines – with sustainability always front-of-mind.

Even the manufacturing process has local ties, with facilities spread across the globe so plants and machines are built near customers. This helps keep products compatible with local standards while typically reducing transport costs – and making the process greener, too.

In a global industry, Ammann's commitment to keeping our customers close guides our growth.

THE SERVICES

TRAINING

Ammann training blends classroom settings with hands-on, instructor led experiences. Customers can attend a group session or bring an Ammann trainer to a location of their choice.

CUSTOMER SUPPORT

Expert technicians, who speak local languages, are always nearby. Some products require 24-hour support, and the Ammann hotline is there to provide it.

PARTS

The Dealer network and an online ordering system maximise parts availability. Service kits and preventive maintenance packages help keep all Ammann products up and running.

THE PEOPLE WHO USE THEM

"AMMANN PRODUCTS HAVE LOW FUEL CONSUMPTION, GOOD COMPACTION FORCE AND ARE VERY DURABLE."

G.R. Karannagoda, Ambalantota, Sri Lanka

"THE MACHINES HELP TO MAKE OUR BUSINESS VERY PROFITABLE."

Paul Matera Alberta, Canada

"THE MACHINES ARE TOUGH AND WORKED WELL. THEY ARE RELIABLE AND DON'T BREAK DOWN."

Poon Soon Huat, Singapore

"MANAGEMENT LIKES THE COMBINATION OF AMMANN PAVERS AND ROLLERS BECAUSE OPERATORS LIKE THEM."

Ye' Myint, Yangon, Myanmar

"BASED ON OVERALL PERFORMANCE, I WOULD ALWAYS RECOMMEND AN AMMANN CONCRETE MIXING PLANT TO OTHERS."

Michael Müller, Cham, Germany

"THIS (SPEEDYBATCH) PLANT IS THE PERFECT SOLUTION."

Jaime Arnó, Barcelona, Spain

"ALL THE PLANTS ARE FUEL EFFICIENT, REQUIRE LITTLE MAINTENANCE, PROVIDE ACCURATE DOSING AND ARE CONSISTENT AND RELIABLE."

Zhen Jianling, Tianjin, China

THE PRODUCTS

FROM PLATES TO PLANTS

Ammann products cover the entire roadbuilding process. Soil compactors handle site preparation, while concrete- and asphalt-mixing plants produce materials. Asphalt pavers place the mix, and rollers handle breakdown and final compaction. Ammann light equipment is essential, too, helping operators access hard-to-reach places on challenging jobsites.
